DEX landing page

1.introduction

- this project is the opening page to a D.E.X similar to emeris.com, pancakeswap, and uniswap. the key features of this prtoject is for a list and discription of coins and beingable to connect a digital wallet.

2. User Interface Design and Prototype

- itll be a simple looking page with mainly just a navbar with details abnd pictures

3.Navigation Structure

- the navagational structure will be controled by the Navbar with a dropdown menu for assets(coins) to types of assets to that particular group; and for the wallet will have a button on the navbar to connect a wallet to the website and pull up that particular wallets api to connect it.
